

TRAY HANDLING TH-750

TRAY HANDLING TH-750

TRAY HANDLING SYSTEM

The Tray Handling System is designed for automatic loading and unloading of racks. Danmatic's Tray Handling System is one of the fastest and strongest systems in the market. The system automatically handles up to 750 trays per hour.

One of the major advantages of the TH-750 is that it lifts up the rack from the floor and into the robot. This ensures great precision and gentle handling of your equipment.

BENEFITS

- Servo controlled stacking unit for quick and exact tray handling
- Central control with touch panel

OPTIONS

- Indexing conveyor for trays
- Storage for three extra racks to ensure a more steady production
- Tray feeder
- Modem for online service
- With a Danmatic Retraction Unit it is possible to place the products directly on the trays before entering the TH-750
- Tray cleaner can be built into the line

TECHNICAL DATA

- Capacity ranging up to 750 trays/h
- Manufactured in stainless steel and food approved materials
